

## Language Notes

Icelandic letter types have not been used in the thesis text; instead they have been anglicized with the following English letters:

Icelandic letters      =      Anglicized letters

Ð ð                      =      Th th

Þ þ                      =      Th th

Æ æ                      =      Ae ae

Ö ö                      =      O o

English has been used in questionnaires and interviews with Icelanders, because it is the commonly preferred language for international communication and well understood by most.
